# Joobi

## Joobi Installation

Just follow the steps :

- 1 - Upload the project to your server and extract all the folders.
- 2 - Go to `config/config.php` & `config/app.php` & `config/database.php` & `config/email.php`
- 3 - Config every file above with your own information.
- 4 - Create a new database.
- 5 - Go to `installation/install.sql` and import the file to new created database.
- 6 - Go to `<ROOT_DIRECTORY/admin>`.
- 7 - Open `.env` and config the database.
- 8 - Enjoy !. ☐

In your `config/app.php` put the APP URL without `'/'` at the end of the URL

Turn OFF the debug mode in **PRODUCTION** mode
